

## ***image2world* - Samples**

This package contains an ***image2world*** example project: unpack the archive in a folder on your PC.

### ***image2world***

Start ***image2world*** and load the project file *\*.m\_project*: enjoy!

### **ArcGIS**

In the *\_ArcGIS* folder you find the ArcGIS project corresponding to the ***image2world*** example. Start ArcGIS Pro (version 3.0 or higher) and open the project.

Using the *swipe* function in the map *Zurich-1924-2022* you can see an example of the reprojection of the Google Earth of 2022 image on the image of Eduard Spelterini of 1904.
